

A man wearing a bright red jacket, dark pants, and a black cap stands on a narrow, dark horizontal ledge that appears to be a narrow path or a tightrope. He is positioned in the center of the frame. Below him, the calm water of a lake or fjord perfectly reflects his figure and the surrounding landscape. To the left, a large, rugged mountain peak covered in snow and patches of green vegetation rises steeply. In the far distance, more snow-capped mountain ranges are visible under a clear, pale blue sky. The overall scene conveys a sense of adventure and outdoor exploration.

ASCENT

The way up. Or perhaps, the way anywhere.
With no limits, no restrictions. In the mountains
or any wilderness. Out of civilization, without
assistance.

The Ascent series includes the best products,
materials, and technologies available today.

They are products that can be relied on
absolutely, no matter the conditions.

SPIKE VEST

Light and slim-fit vest made of light, ripstop-structured polyamide strengthened with ultra-high-molecular-weight polyethylene fibres (UHMWPE). For insulation, we have used Polartec® Alpha® Direct.

The upper offers outstanding weight and durability ratio and DWR treatment. The insulation is light, yet retains heat and is greatly breathable. Elastic polyamide panels at the sides promote narrow, athletic fit. Together, this unique blend of materials works best during physical activity in cold conditions.

- comfortable, narrow collar
- two-way, YKK vislon full length zipper
- two chest pockets, two pockets at the sides

Material: light, ripstop-structured polyamide with UHMWPE
Polartec® Alpha® Direct 90 g/m²
89% Polyamide + 11% Spandex panels

Weight: (M) 280 g

Sizes: S M L XL

BLACK

TAWNY OLIVE

ORGIL

An ultralight, breathable climbing anorak that retains high level of abrasion and tear resistance, as well as freedom of movement.

Mechanical resistance and the absence of a full-length zipper mean you don't have to worry about climbing over a rough slab of rock or sticking your arm in a crevice.

- Anatomic hood with elastic brim is easily adjustable with one hand and fits just about tight enough.
- DWR treatment repels light rain
- spacious front pocket with organizer
- thumb loops
- draw cord at the hips

Material: Ultra-high-molecular-weight polyethylene offers outstanding weight and durability ratio. Highly breathable and treated with DWR.
92% Nylon (Recycled), 8% Polyethylene, 41g/m², Ripstop

Weight: 118 gg

Sizes: S M L XL

TAWNY OLIVE

BLACK

ORGIL PANTS

Climbing pants that perfectly complement the Orgil anorak. Thanks to the state-of-the-art material, the Orgil pants come with low weight and still offer great mechanical resistance.

Short zippers on the bottom of the legs allow dressing over climbing shoes.

The anatomical fit and stretch material ensure you can focus on climbing and easily forget you're wearing anything at all.

Light, durable and easy to use. That's why you'll pack Orgil pants for all your climbing adventures when being light & fast matters.

- two side pockets
- short zippers at the bottom of the legs
- elastic waistband with drawcord
- anatomically shaped knees

Material: Ultra-high-molecular-weight polyethylene offers outstanding weight and durability ratio. Highly breathable and treated with DWR.

92% Nylon (Recycled), 8% Polyethylene, 41g/m2, Ripstop

Weight: (M) 137 g

SERAK

A long-sleeved anatomic ski top that takes full advantage of the superior comfort and performance of Polartec® Power Stretch® material. Recommended for use in combination with Serak pants.

- Seamless collar
- Flatlock seams
- Anatomic shape
- Forward shifted lateral seams

Material: Polartec® Power Stretch®
Weight: (M) 290 g
Sizes: S M L XL XXL

MAROCAN BLUE

Pants made of Polartec® Power Stretch® suitable for all kinds of outdoor activities. Fully compatible with Serak pullover.

- Drawstring waist
- Flatlock seams
- Anatomic shape

Material: Polartec® Power Stretch®
Weight: (M) 200 g
Sizes: S M L XL XXL

BLACK

ROIBOS TEA / CHARCOAL

ANTIQUE MOSS

CAVIAR BLACK

SERAK WM'S

A women's version of a long-sleeved anatomic ski top that takes full advantage of the superior comfort and performance of Polartec® Power Stretch® material. Designed for the contours of the female body.

- Seamless collar
- Flatlock seams
- Anatomic shape
- Forward shifted lateral seams

Material: Polartec® Power Stretch®

Weight: (M) 240 g

Sizes: S M L XL

A women's version of pants made of Polartec® Power Stretch® suitable for all kinds of outdoor activities. Fully compatible with Serak pullover.

- Drawstring waist
- Flatlock seams
- Anatomic shape

Material: Polartec® Power Stretch®

Weight: (M) 200 g

Sizes: S M L XL

CRYSTAL TEAL / MOROCCAN BLUE

BLACK

ROIBOS TEA

ANTIQUE MOSS

CAVIAR BLACK

MERA

Midweight zip neck base layer top for activities in cooler temperatures.

Deltapeak®TL by Teijin provides a soft hand, stretch, thermal comfort and moisture management

- Flatlock construction improves next-to-skin comfort
- No underarm seam construction

Material: Teijin Deltapeak®TL

Weight: (M) 218 g

Sizes: S M L XL XXL

CHARCOAL / BLACK

Pants made of Teijin Deltapeak TL material.

- Flatlock construction improves next-to-skin comfort
- No underarm seam construction

Material: Teijin Deltapeak®TL

Weight: (M) 218 g

Sizes: S M L XL XXL

CHARCOAL / BLACK

CHARCOAL

GTX MITTENS

Long insulated mittens for a wide range of use. Removable insert made of synthetic fur. Wrist adjustment. Pre-curved fingers. One-touch draw cord adjustment. Long forearm loop. Various colors.

Material: 3-Layer GORE-TEX®
Weight: 200 g
Sizes: UNI

BALACLAVA

An anatomically designed, breathable balaclava made of elastic material.

Material: Polartec® Power Stretch®
Weight: 55 g
Sizes: UNI

BEANIE

All-round use beanie made of Polartec® Power Stretch® material.

Material: Polartec® Power Stretch®
Weight: 30 g
Sizes: L XL

CAP

A close-tight cap made of Polartec® Power Stretch® material.

Material: Polartec® Power Stretch®
Weight: 35 g
Sizes: L XL

GORE MICRO TAPE

All our three-layer garments use only 13 mm seam tape instead of the standard 22 mm. This means less weight, less volume, better breathability, and an overall increase in garment comfort.

SEAM ALLOWANCES

Using 13 mm tape means our seam allowances measure only 2.5 mm instead of the standard 6 mm. Amman thread and a stitch count of 5 stitches per 1 cm means exceptional seam quality and reliability.

STOCKO FLEX FIX

The absolute state-of-the-art in press button technology: waterproof press buttons with patented Flex Fix system. Fifty thousand uses guaranteed.

CUFF VELCRO™ ADJUSTMENT OF THE SLEEVE

STITCHLESS LAMINATED INNER POCKET

WATERTIGHT™ ZIPPERS AND ZIPPER GARAGES

THE POWER OF DETAIL

To feel comfortable in the outdoors, appropriate clothing is a must. When choosing clothing suitable for the intended level of exertion and the expected weather, we should remember that it may be necessary to make changes according to the weather or the intensity of activity. Modern functional clothing systems usually consist of three layers. When worn together, these layers resist weather conditions, regulate heat and body moisture, and allow the wearer to stay as comfortable as possible in any situation.

ABSORPTION LAYER

The absorption layer transports moisture (i.e. perspiration) away from the body. It is made of synthetic non-absorbent fibres and is in direct contact with the skin. Proper wicking of moisture away from the skin is an essential requirement of technical clothing, and without it, the entire system may be compromised.

INSULATION LAYER

The insulation layer reduces heat loss and is breathable so that water vapor condensation is minimized. It can also function as a top layer. In these cases, its windproof and water-resistant qualities become more important.

TOP LAYER

The waterproof and windproof qualities of the top layer protect against unfavorable weather, like rain and snow. The top layer is also breathable, and therefore protects the interior layers against the accumulation of moisture.

LAYERING SYSTEM

GORE-TEX®

Garments made with 3-layer GORE-TEX® fabric with a tricot backer are durably waterproof, windproof and very breathable. With less bulk, they are the ideal solution for outdoor enthusiasts who enjoy demanding activities in a wide range of conditions.

GORE-TEX® Paclite® Plus

GORE-TEX® Paclite® Plus garments use a 2-layer unlined construction. The GORE-TEX® membrane is laminated to an abrasion resistant outer face textile, assuring durable protection. A new abrasion resistant treatment of the inner surface makes a separate lining unnecessary. This makes them thin, light, and highly packable – while being all durably waterproof, windproof, and extremely breathable.

GORE-TEX® Active

GORE-TEX® Active fabrics make up the lightest and most breathable 3-layer collection in the GORE-TEX® product family. They combine a newly developed lightweight GORE-TEX® membrane with fine 13-30 denier performance textiles and a light “c-knit” backer material. Together, these materials deliver the ultimate 3-layer solution, with improved softness and next-to-skin comfort compared to traditional 3-layer fabrics.

GORE-TEX® ShakeDry™

GORE-TEX® ShakeDry™ is a revolutionary textile that eliminates the face fabric, making the GORE-TEX® membrane itself the outer surface. The membrane’s persistent repellency causes water to simply bead up and rolls right off the jacket. The removed outer layer also makes ShakeDry™ jackets as light and packable as it gets.

GORE-TEX® Pro

Ideal for extended use in rugged environments and extreme conditions, GORE-TEX® Pro is a 3-layer fabric engineered for maximum durability and protection. GORE-TEX® Pro products utilize a revolutionary multilayer membrane system with a unique microstructure. The membrane is durably bonded to both the rugged outer material and specially developed robust inner lining. Built with robust outer face textiles between 40-200 denier, GORE-TEX® Pro garments are highly abrasion and snag resistant. They also benefit from Gore’s patented Micro Grid Backer technology: a specially woven lining that protects the membrane from abrasion on the inside, and slides easily over layers. This low-denier backer is still highly breathable and robust, without adding excessive weight. All GORE-TEX® Pro products must pass extremely rigorous laboratory tests.

GORE-TEX® Infinium™ Windstopper®

GORE-TEX® Infinium™ Windstopper® fabrics combine the soft, comfortable fit of a mid-layer with the reliable protection of a shell against cold wind, light rain and snow. Windstopper® provides maximum comfort and freedom to enjoy the widest range of activities and weather conditions. Garments made with this tech are windproof, water resistant, very breathable, snow shedding, abrasion resistant and stretchy, too.

CLIMASHIELD® Apex

CLIMASHIELD® Apex is a breathable and lofty synthetic insulation made with ultra-fine fibers and specially treated to be water resistant. Apex gives great thermal insulation to help the body maintain its temperature, minimizing energy loss. Extremely light and soft, it was originally developed by the US Army to replace natural down. As down absorbs moisture, it becomes wet and loses its thermal-insulating abilities. CLIMASHIELD® absorbs three times less water, is 14% warmer when dry and 24% warmer when wet than the competitive insulations.

POLARTEC® POWER STRETCH®

This material is elastic fleece with a high level of thermo-regulation. It’s very light and breathable and doesn’t absorb body moisture.

THE PROPERTIES OF OUTDOOR CLOTHING

Functional outdoor clothing must be waterproof, windproof, and breathable. It's about maximum functionality in various weather conditions and under various levels of exertion. Tilak creates this functionality by combining lightweight and durable materials with top-quality design.

MAINTENANCE

Please follow the instruction symbols shown on the inner label of each product. While washing, we recommend using the original products approved for each kind of clothing.

For more detailed maintenance information please see the website www.tilak.com and navigate to section Service → Maintenance or simply scan the QR code below.
